Machinery Failure, Vibration & Predictive Maintenance

23 - 27 Sep 2018, Dubai
Introduction

Machines deteriorate as they get older so we can expect a certain amount of performance falloff and general deterioration of the machine. If we understand the failure mechanisms that are in place we can identify which parameters best indicate the deterioration of the machine.

Failure analysis and Predictive Maintenance techniques, including vibration analysis, are discussed in the course with a view to optimising the maintenance engineering effort while maximising production. Other techniques that will be addressed include infrared thermography, passive ultrasonics, tribology and performance monitoring.

Objectives

At the end of this training seminar participants will have:

• An understanding of Machine Failure Analysis techniques
• An understanding of a range of Predictive Maintenance Technologies
• Knowledge of the potential contribution of each these technologies to maintenance efficiency
• Guidelines indicating how these technologies can interact with and support each other
• Hints and Tips for practical application of these technologies so as to achieve the best results

A practical approach to developing an action plan to utilise these technologies in their own areas of responsibility, fitting them into the overall maintenance strategy, and measuring benefits.

Organisational Impact

Analysis of machine failures and predictive maintenance of rotating plant is vital to the budgetary success of the operations organisation. On completion of this training seminar, the delegate will be able to critically analyse the methodologies employed within the organisation and instigate improvements where required.

Personal Impact

Technical knowledge is key to effective control and peer respect within any maintenance organisation; when this is achieved personal satisfaction follows. This training seminar will give the delegate the required level of technical knowledge and skill to achieve that personal satisfaction.

Who Should Attend?

• Supervisors
• Team Leader and
• Professionals in Maintenance, Engineering and Production

The training seminar will also benefit anyone who wishes to update themselves on Predictive Maintenance Technologies and Failure Analysis techniques, as well as those who have to judge the suitability of these technologies for their needs, and learn how to implement them for the benefit of their organisations.

Training Methodology

The training seminar will be conducted along workshop principles with formal lectures, case studies and interactive worked examples. Relevant case studies will be provided to illustrate the application of each tool in an operations environment. Each learning point will be re-enforced with practical exercises. There will be ample opportunities for discussion and sharing experiences.
# Seminar Outline

## DAY 1

### Understanding Failures
- Machine Failure Analysis
  - Wear and Tribology
  - Fatigue Mechanisms
  - Plain, tilt-pad and anti-friction bearing and seal failures

## DAY 2

### Avoiding Failures
- Troubleshooting Techniques
- Statistical Analysis of Machinery Failures

## DAY 3

### Understanding Predictive Maintenance
- Predictive Maintenance Concepts
  - Introduction
  - Maintenance Strategies
  - Predictive Maintenance – background and history
  - Predictive Maintenance Technologies – an overview
  - Potential Failure Analysis – deciding which technologies to apply
- Vibration Analysis
  - Introduction to Vibration Analysis
  - Frequency Analysis and the Fast Fourier Transform
  - Vibration Transducers
  - Basic Failure Mechanisms with examples

## DAY 4

### Using Predictive Maintenance
- Vibration Standards and Alarm Levels
- Vibration Diagnostics
- Amplitude Demodulation – a.k.a Enveloping, SSE, HFD, Peak-Vue
- Vibration on Rolling Element Bearings
- Resonance – identification & cure
- Other Predictive Maintenance Techniques
  - Infrared Thermography
  - Thermographic applications
  - Passive Ultrasonics - contact and non-contact
  - Ultrasonic Applications
  - Tribology – oil analysis

## DAY 5

### Control Mechanisms
- Managing Predictive Maintenance
  - Performance and Efficiency Monitoring
  - Managing the Predictive Maintenance effort
  - Cost Analysis
  - Reporting Techniques
- Integrating Predictive Maintenance into the Maintenance Plan
Machinery Failure, Vibration & Predictive Maintenance

REGISTRATION DETAILS

LAST NAME: __________________________________________
FIRST NAME: _________________________________________
DESIGNATION: _______________________________________
COMPANY: ________________________________________
ADDRESS: ________________________________________
__________________________________________________
CITY:______________________________________________

PAYMENT DETAILS

☐ Please invoice my company
☐ Cheque payable to GLOMACS
☐ Please invoice me

CERTIFICATION

Successful participants will receive GLOMACS’ Certificate of Completion

4 WAYS TO REGISTER

Tel: +971 (04) 425 0700
Fax: +971 (04) 425 0701
Email: info@glomacs.ae
Website: www.glomacs.ae

TERMS AND CONDITIONS

• Fees – Each fee is inclusive of Documentation, Lunch and refreshments served during the entire seminar.
• Mode of Payment – The delegate has the option to pay the course fee directly or request to send an invoice to his/her company/ sponsor. Credit card and cheque payments are both acceptable.
• Cancellation / Substitution – Request for seminar cancellation must be made in writing & received three (3) weeks prior to the seminar date. A US$ 250.00 processing fee will be charged per delegate for each cancellation. Thereafter, we regret that we are unable to refund any fees due, although in such cases we would be happy to welcome a colleague who would substitute for you.
• Hotel Accommodation – is not included in the course fee. A reduced corporate rate and a limited number of rooms may be available for attendees wishing to stay at the hotel venue. Requests for hotel reservations should be made at least three (3) weeks prior to the commencement of the seminar. All hotel accommodation is strictly subject to availability and terms and conditions imposed by the hotel will apply.
• Attendance Certificate – a certificate of attendance will only be awarded to those delegates who successfully completed/ attended the entire seminar including the awarding of applicable Continuing Professional Education Units/Hours.
• Force Majeure – any circumstances beyond the control of the Company may necessitate postponement, change of seminar venue or substitution of assigned Instructor. The Company reserves the right to exercise this clause and implement such amendments.
• Fair Access / Equal Opportunities – In the provision of its services as a world-class Training Provider, the Company is committed to provide fair access / equal opportunities throughout the delivery of its courses and assessment leading to the completion of training seminars, or 3rd party qualifications/certifications.
