Refinery Process Yield Optimisation

08 - 12 Apr 2018, Dubai
16 - 20 Dec 2018, Dubai
Introduction

This training seminar will present a detailed overview of refining process yields, from the crude oil feed to the finished products. It is targeted at personnel directly involved in refining utilization and optimization, including but not limited to refining technologists and operations personnel as well as non-technical personnel interested in these processes or involved in refinery planning.

All the major refining processes are explored and examined with a view of understanding and appreciating how each unit relates to each other whilst at the same time how these relationships can enhance refinery operations.

Major refining processes are presented and discussed, including feedstock, feedstock preparation, operating conditions, catalysts, product properties and refinery yields. Refining economics will be included as means to optimizing refining operations and profitability.

The seminar is oriented toward the practical aspects of refinery operations and yield optimization and includes the terminology used in the industry.

Objectives

- To familiarize and understand the various refinery types and appreciate how refining complexity impacts refining optimization and refining margins
- Comprehend the importance quality giveaways and learn how use blending calculations to reduce these
- Use hands-on software that allow professionals in the industry to choose different types of crude diets and thus optimize refinery utilization and efficiency
- Act as a primer into the industry of Petroleum Refining to maximize process fluid yields
- Familiarize industry professionals with all processes associated with the processing of petroleum into finished products
- Equip new engineers into the industry, with the basic tools for understanding the complex nature of Refining and its operations

Training Methodology

Process Yields is a hands-on, stimulating learning experience with access to professional software used by refining technologists and experts for optimizing refining operations. The seminar will be highly interactive, with opportunities to advance your opinions and ideas. Participation is encouraged in a supportive environment.

To ensure the concepts introduced during the seminar are understood, they will be reinforced through a mix of learning methods, including lecture style presentation, open discussion, case studies, software simulations and group work.

Attendees will have the opportunity to develop personal competencies and build up expert knowledge of crude oil yield processes in a range of equipment.

Who Should Attend?

This seminar is intended for refining professionals working in the industry either as refining technologists or in refining operations and engineers. It is designed to allow a further understanding of the various processes available and how these can be optimized to improve yields and refining margins.

- Refining engineers
- Operations personnel including shift supervisors
- Marketers and refinery planners
- Blending professionals
- Other engineers who would like a further understanding of the complex refining processes
- Accountants, marketers and other professions who would like to comprehend the advantages and limitations of the various refining processes at their site

would like to comprehend the advantages and limitations of the various refining processes at their site
**Seminar Outline**

**DAY 1**

**Crude Oil Yields Refinery Technology**
- Introduction to Crude Oil Origins & Characteristics
- Crude oil Assay and properties
- Crude oil products & Product specifications
  - LPG
  - Gasoline
  - Kerosene/Jet Fuel
  - ACO/Diesel Fuel Oil
  - Petrochemical Feedstocks
- Overall refinery flow: interrelationship of processes

**DAY 2**

**Petroleum Refinery Processes**
- Crude Processing
- Desalting
- Atmospheric distillation
- Vacuum distillation
- Heavy Oils Processing / Bottom of the barrel upgrading
  - Coking and Thermal Processes
  - Delayed Coking
  - Fluid Coking
  - Flexicoking
  - Visitbreaking
- Case study - example

**DAY 3**

**Process for Motor Fuel Production**
- Fluid catalytic cracking
- Hydrocracking
- Cat Cracking
- Isomerization
- Alkylation
- Hydrotreating
- Catalytic Reforming
- Case study - example

**DAY 4**

**Supporting Operations**
- Blending for Product Specifications
- Hydrogen production
- Refinery Gas Plants
- Acid Gas Treating
- Sulfur Recovery Plants
- Utilities
- Case study - example

**DAY 5**

**Refinery Economics**
- Residue Reduction
- Asphalt and Residual Fuel
- Refinery Complexity and Netback
- Economic Evaluation
- Cost Estimation
- Case Studies
- Group Discussions
- Program Evaluation & Summary

TERMS AND CONDITIONS

• Fees – Each fee is inclusive of Documentation, Lunch and refreshments served during the entire seminar.
• Mode of Payment – The delegate has the option to pay the course fee directly or request to send an invoice to his/her company/sponsor. Credit card and cheque payments are both acceptable.
• Cancellation / Substitution – Request for seminar cancellation must be made in writing & received three (3) weeks prior to the seminar date. A US$ 250.00 processing fee will be charged per delegate for each cancellation. Thereafter, we regret that we are unable to refund any fees due, although in such cases we would be happy to welcome a colleague who would substitute for you.
• Hotel Accommodation – is not included in the course fee. A reduced corporate rate and a limited number of rooms may be available for attendees wishing to stay at the hotel venue. Requests for hotel reservations should be made at least three (3) weeks prior to the commencement of the seminar. All hotel accommodation is strictly subject to availability and terms and conditions imposed by the hotel will apply.
• Attendance Certificate – a certificate of attendance will only be awarded to those delegates who successfully completed/attended the entire seminar including the awarding of applicable Continuing Professional Education Units/Hours.
• Force Majeure – any circumstances beyond the control of the Company may necessitate postponement, change of seminar venue or substitution of assigned Instructor. The Company reserves the right to exercise this clause and implement such amendments.
• Fair Access / Equal Opportunities – In the provision of its services as a world-class Training Provider, the Company is committed to provide fair access/equal opportunities throughout the delivery of its courses and assessment leading to the completion of training seminars, or 3rd party qualifications/certifications.
