ENERGY ISOLATION
Standards, Techniques & Best Practices

30 Jun - 04 Jul 2019, Dubai
INTRODUCTION

It is important for modern day process plants, large industrial installations, Oil & Gas plants and offshore installations to be able to implement methods of operation which are reliable, proactive and cost effective. In the 21st Century, a modern practice to ensure that practical and cost effective are utilized, is to have a multi-skilled workforce.

This GLOMACS Energy Isolation training course will provide authorized workers with step-by-step procedures for isolating equipment using such techniques as lockout tagout, lockbox, blinding, misalignment, double block and bleed, and single valve isolation. It emphasizes each employee's responsibilities during those procedures using practice exercises and simulations. Key Topics Covered: Energy Isolation Standard, the types of energy sources, potential hazards, and step-by-step procedures for isolating equipment.

This GLOMACS training seminar will highlight:

- The Importance of Regional Legislative Requirements
- Best Practice vs. Minimum Requirement
- Safe Working Practices
- Electrical Isolation and Procedures
- Instrumentation System Isolation
- Mechanical Isolation
- Common Problems and Solutions

OBJECTIVES

To provide the necessary competencies, skills and knowledge to enable course delegates to use the proper procedures for isolating the energy source(s). This GLOMACS Energy Isolation training course covers recognition of hazardous energy sources, procedures and methods of isolation and specific standards and practices for electrical and mechanical energy isolation.

By the end of this GLOMACS training course, participants will learn to:

- Demonstrate familiarity with the principals of Energy Isolation
- Demonstrate a basic understanding energy sources
- Demonstrate a basic awareness of procedures standards and practices
- Understand the need for implementing Safe Systems of Work
- Understand common terminology related to isolations and control
- Understand common energy hazards

TRAINING METHODOLOGY

A variety of technical lectures, practical demonstrations and practical exercises will be used to deliver the training to candidates. Case studies and examples of good and bad practice will also be demonstrated through practical demonstration and case study DVD and also group activity and discussion. At the end of this GLOMACS Energy Isolation training course, Written Assessment will also be completed by all delegates.

ORGANISATIONAL IMPACT

The impact from sending your work force onto this training course are wide and far reaching. Delegates will gain a variety of practical and theoretical knowledge which complies with current practice and legislation. The knowledge gained by delegates can be applied back in their work roles and can be used to ensure the following:

- Reduced costs for organisations, when Energy Isolation activities can be kept 'in-house'
- Downtime of equipment will be minimized, due to delegate increased knowledge
- Delegates are conversant in Health & Safety and legal requirements when working with Electrical, Instrument and Mechanical equipment
- Delegates are up-to-date with current practices and techniques when using Electrical, Instrument and Mechanical technology
- Delegates with gain a very good basic understanding of a variety of Electrical, Instrument and Mechanical equipment
- Delegates will be able to apply good practice techniques to diagnose problems with Electrical, Instrument and Mechanical equipment

PERSONAL IMPACT

- Delegates will be able to gain a thorough knowledge of Health & Safety requirements, the electricity at work regulations and common industry practices such as Permit to Work and safe isolation techniques such as LOTO
- Delegates will be able to apply safe working practices when working with Extra Low Voltage, Low Voltage and some High Voltage applications
- Be able to use a variety of Engineering drawings such as Single-line, Schematic, Component, PLC, Hook-up, P&ID and Loop drawings
- A good working knowledge of isolation and risk assessment procedures for the plant
- Delegates will be aware of different roles within the Electrical safety rules, such as CEP, CIP, SAEP, RPE AND SEA
- Delegates will become familiar with Instrumentation systems and Mechanical systems
- Gain familiarity with problems associated with Electrical, Instrument and Mechanical isolation

WHO SHOULD ATTEND?

This GLOMACS training course is suitable to a wide range of professionals but will greatly benefit:

- Operatives / Employees working with Processes
- Operatives / Employees working with Machines or equipment in which the sudden release of energy could cause injury or damage
- Persons with specific plant responsibility
- Persons with Technical executive function
- Qualified Supervisors within an Energy Isolation environment
- Plant Operators and Operator Technicians within the Onshore and Offshore Oil and Gas Industry
- Plant Operators and Operator Technicians within the Petrochemical and Manufacturing Industry
- Any other plant personnel directly responsible for performing Safe Process Isolations
- Any other plant personnel indirectly responsible for performing Safe Process Isolations. Such persons may include Senior Operational Managers and anyone who monitors, audits and reviews isolations systems
SEMINAR OUTLINE

**DAY 1**

Energy, Legislative Requirements and Codes of Practice
- Introduction
- Pre-Assessment
- What is Energy?
- Common Energy Sources
- OSHA requirements and Electricity at Work Regulations
- Procedures, Standards and Approved Codes of Practice

**DAY 2**

Safe Systems of Work, Electrical Isolation and LOTO
- Recap on Day 1
- Introduction to Energy Isolation (Electrical)
- Safe Systems of Work
- Safe Working Practices
- Electrical Isolations and Techniques
- LOTO Requirements
- Earthing Requirements for Isolation
- Issues / Problems Associated with Electrical Isolation

**DAY 3**

Documentation, Instrumentation, Control and Associated Mechanical Systems
- Recap on Day 2
- Isolation Confirmation Certificates
- Introduction to Energy Isolation (Instrumentation)
- Instrument Isolation Techniques
- Intrinsically Safe Systems and Dangers Associated with Intrinsic Safety
- Safe Systems of Work
- ELV Isolation for Instrument Energy Sources
- ‘Block and Bleed’ Techniques
- Isolation of Instrument Piping
- Isolation of Instrument Devices Used in Process Control
- Issues / Problems Associated with Instrumentation Isolation

**DAY 4**

Mechanical Systems, Hydraulics, Pneumatics and Potentially Explosive Energy
- Recap on Day 3
- Introduction to Energy Isolation (Mechanical)
- Safe Systems of Work and Safe Working Practices
- Mechanical Isolation Techniques
- Valves, Gearboxes and Motors
- Piping, Pipe Flanges and Joints
- Hydraulic and Pneumatic Isolation
- Issues / Problems Associated with Mechanical Isolation
- Introduction to Potentially Explosive Atmospheres
- Standards and Good Practices

**DAY 5**

Potentially Explosive Energy, Concepts and End of Course Assessment
- Recap on Day 4
- Safe Working Practices
- Overview of Potential Electrical Energy Release Risks
- Overview of Potential Instrument Energy Release Risks
- Overview of Potential Mechanical Energy Release Risks
- Ignition Energy Assessment of Process / Oil & Gas Operations
- Overview of Equipment Concepts (Ex. d, Ex e, Ex n, Ex i, d, c, k, b, Fr)
- End of Course Assessment
ENERGY ISOLATION
Standards, Techniques & Best Practices

PAYMENT DETAILS

☐ Please invoice my company
☐ Cheque payable to GLOMACS
☐ Please invoice me

CERTIFICATION

Successful participants will receive GLOMACS' Certificate of Completion

4 WAYS TO REGISTER

Tel: +971 (04) 425 0700
Fax: +971 (04) 425 0701
Email: info@glomacs.com
Website: www.glomacs.com

TERMS AND CONDITIONS

• Fees – Each fee is inclusive of Documentation, Lunch and refreshments served during the entire seminar.
• Mode of Payment – The delegate has the option to pay the course fee directly or request to send an invoice to his/her company/ sponsor. Credit card and cheque payments are both acceptable.
• Cancellation / Substitution – Request for seminar cancellation must be made in writing & received three (3) weeks prior to the seminar date. A US$ 250.00 processing fee will be charged per delegate for each cancellation. Thereafter, we regret that we are unable to refund any fees due, although in such cases we would be happy to welcome a colleague who would substitute for you.
• Hotel Accommodation – is not included in the course fee. A reduced corporate rate and a limited number of rooms may be available for attendees wishing to stay at the hotel venue. Requests for hotel reservations should be made at least three (3) weeks prior to the commencement of the seminar. All hotel accommodation is strictly subject to availability and terms and conditions imposed by the hotel will apply.
• Attendance Certificate – a certificate of attendance will only be awarded to those delegates who successfully completed/ attended the entire seminar including the awarding of applicable Continuing Professional Education Units/Hours.
• Force Majeure – any circumstances beyond the control of the Company may necessitate postponement, change of seminar venue or substitution of assigned Instructor. The Company reserves the right to exercise this clause and implement such amendments.
• Fair Access / Equal Opportunities – In the provision of its services as a world-class Training Provider, the Company is committed to provide fair access / equal opportunities throughout the delivery of its courses and assessment leading to the completion of training seminars, or 3rd party qualifications/certifications.
